What is an argument?

Preliminaries	Assignments	Questions o	Logic & Arguments	Validity 000000000000000000000000000000000000	Summary 00
Logic &	Araumer	nts			

Arguments have structure:

- Conclusion: a sentence (or 'proposition') argued for.
- Premises: sentences (or `propositions') intended to give reasons for thinking conclusion is true.

Preliminaries	Assignments	Questions o	Logic & Arguments	Validity 000000000000000000000000000000000000	Summary 00
Logic &	Argumer	nts			

The Labour Party will win the next UK General Election. When real wages are falling, the opposition party tends to win. Moreover, real wages *are* falling and Labour is the opposition party.

Is this an **argument**?

If so, what is the conclusion? What are the premises?

Preliminaries 000000000	Assignments	Questions o	Logic & Arguments	Validity 000000000000000000000000000000000000	Summary 00

What makes an argument good?

Preliminaries	Assignments	Questions o	Logic & Arguments	Validity 000000000000000000000000000000000000	Summary 00
Logic &	Argumer	nts			

Two main criteria:

- 1. All of the premises are true.
- 2. The premises support the conclusion.

As logicians, we tend to be more interested in 2 than 1.

Preliminaries	Assignments	Questions o	Logic & Arguments ००००००००००००●०	Validity 000000000000000000000000000000000000	Summary 00

- P2: Real wages *are* falling and Labour is the opposition party.
 - C: The Labour Party will win the next UK General Election.

Truth of premises are matters that economists & political scientists (or Google!) are best qualified to answer.

Logicians better qualified to evaluate whether premises support conclusion.

Preliminaries	Assignments	Questions o	Logic & Arguments	Validity 000000000000000000000000000000000000	Summary 00
Logic &	Argumer	nts			

Caveat:

Truth/falsity of a premise (or conclusion) sometimes a purely **logi**cal, rather than **empirical**, matter.

E.g. All bachelors are unmarried.

True in virtue of meaning of 'bachelor' & 'married'.

Validity

- An argument is **valid** iff it's impossible for all of the premises to be true & the conclusion to be false (at the same time).
- Where this is so, the premises logically entail the conclusion.

Preliminaries	Assignments	Questions	Logic & Arguments	Validity	Summary
00000000	0000	0	000000000000000	000000000000000000000000000000000000000	00

Summary

Relation of Premises to Conclusion	Premises	Valid/Cogent?	Argument Sound?	Argument Good?	Example
Impossible for premises to be true while conclusion false	All true	Deductively valid	Yes	Yes	Argument 2
Impossible for premises to be true while conclusion false	Some false	Deductively valid	No	No	Argument 3
Premises make conclusion likely, but it's still possible for premises to be true while conclusion false	All true	Inductively cogent, but not deductively valid	No	Yes	Argument 1?
Premises make conclusion likely, but it's still possible for premises to be true while conclusion false	Some false	Inductively cogent, but not deductively valid	No	No	Argument 1?
Premises don't even make conclusion likely	All true	Neither deductively valid nor inductively cogent	No	No	Argument 4
Premises don't even make conclusion likely	Some false	Neither deductively valid nor inductively cogent	No	No	Argument 5

Preliminaries	Assignments	Questions	Logic & Arguments	Validity	Summary
000000000	0000	0	0 00000000000 0000000000000000000000000		0●
Summar	у				

We will only be concerned with whether an argument is **deductively valid** or **invalid**.

This is a course in **deductive logic**.

There is a branch of logic – **inductive logic** – concerned with inductive cogency of arguments.
